

Settings for the vUser Instagram Robot

Like others posts based on hashtags

- You can enter your preferred keywords and hashtags in the specified cell; based on which the Robot finds and likes the posts containing the hashtags.

An Excel file sample for Clothes

Like others posts based on hashtags							
Your preferred hashtags	dress	men_dress	t-shirt	trousers			
posts per hashtag	25						

Like others' posts based on location

- You can specify your preferred states, cities and geographical locations in the Robot settings based on which the Robot only likes the users contained in your specified geographical locations.
- **In order to correctly set the amount for the location, a video tutorial is included in the package.**

An Excel file sample for the Location (city of Tehran)

Like based on location							
List of the locations (cities etc.)	1832385020352417						
Number of like per location	15						

Comment on others' posts based on location

- You can specify your preferred states, cities and geographical locations in the Robot settings based on which the Robot only comment on the users contained in your specified geographical locations.
- **In order to correctly set the amount for the location, a video tutorial is included in the package.**

An Excel file sample for the Location (city of Tehran)

Comment based on location							
List of the locations (cities etc.)	1832385020352417						
Number of comments per location	10						

General follow request and the times

- Activating this option enables the Robot to follow any pages it encounters. The number of times follows request is sent count be set.
- While following, the Bot may face with private pages that might reject your follow request. With the robot asking for following in a number of times, multiple follow requests will be sent to the users.

An Excel file sample to follow 60% of pages and follow 5 times

General Follow (By activating this option, if the robot reaches an individual with any setting, it will follow them)	
Follow request percentage	60
The number of requests sent to each user	5

General commenting

- Activating this option, the Robot leaves your preferred comments for any pages it faces.

An Excel file sample for a list of comments and insertion for 90% of times

General Comment (By activating this option, if the robot reaches an individual with any setting, it will follow them)						
List of comments	Very nice	perfecto	like	Check out my page		
Commenting percentage	90					

Smart hashtag and like

- In this mode, the Robot intelligently generates hashtags according to your inputs and finds synonyms and related terms then like the posts including those hashtags.

An Excel file sample for smart hashtags

Automatic Hashtag (intelligent) and Like hashtags						
Topic (keywords)	clothes	mens_wear	suits	youth		
Generated hashtags based on the topic	5					
Amount of likes based on generated hashtags	10					

Liking the posts on your timeline (feed)

- The Robot can like the posts appearing on your feed page (timeline) on the number you specify.

An Excel file sample for liking 500 posts on timeline

Liking your own timeline posts	
How many should be liked in general	500

Direct follow

- The robot would directly target and follow the IDs you specify in cells.

An Excel file sample for direct follow

Directly follow a list of IDs (pages)							
List of IDs (pages)	suitshop	trend_gallery	jean_best	...			

Follow other pages' followings

- You could insert a list of your competitors in the cells; based on the amount you specify for the Bot the pages your competitors follow will be followed.

An Excel file sample for following other pages' followings

Follow other pages' followings							
List of IDs (pages)	suitshop	trend_gallery	jean_best	...			
How many followers targeted	30						

Follow other pages' followers

- You could insert a list of your competitors in the cells; based on the amount you specify for the Bot, the pages following your competitors will be followed.

An Excel file sample for following other pages' followers

Follow other pages' followers							
List of IDs (pages)	suitshop	trend_gallery	jean_best	...			
How many followers targeted	50						

Follow the commenters of the posts

- You could insert a list of your competitors in the cells; then specify how many of their posts should be checked and how many of the commenters should be followed.

An Excel file sample for following the commenters from competitors' page, targeting 20 posts and 15 commenters

Follow the commenters of the posts							
Whose posts should be targeted	jimmy_abc	Hyepr_gallery	top_jeans	...			
How many posts should be targeted	20						
How many commenters should be commented	15						

Follow the likers of the posts

- You could insert a list of your competitors in the cells; then specify how many of their posts should be checked and how many of the likers should be followed.

An Excel file sample for following the likers from competitors' page, targeting 15 posts and 10 likers.

Follow the likers of the posts						
Whose posts should be targeted	jimmy_abc	Hyper_gallery	top_jeans		
How many posts should be targeted	15					
How many likers should be commented	10					

Earn customers by other pages' followers

- You could insert a list of your competitors in the cells; then specify how many of the pages' followers should be targeted, how many of their posts checked and what comments inserted.
- The robot could also like these pages automatically.

An Excel file sample for earning customers from other pages' followers with a comment on posts

Earn customers by following other pages followers (with comment)					
List of IDs (pages)	jimmy_abc	Hyper_gallery	top_jeans	
List of comments	Very good	perfecto	Nice one	Check out my page	
How many followers should be targeted	100				
How many posts should be commented	20				

Earn customers from other pages' followings

- You could insert a list of your competitors in the cells; then specify how many of the pages they followed should be targeted, how many of their posts checked and what comments inserted.
- The robot could also like these pages automatically.

An Excel file sample for earning customers from other pages' followings with a comment on posts

Earn customers by following other pages followings (with comment)					
List of IDs (pages)	ny_gallery	Boston_jeans	bestdress	
List of comments	Keep it up	perfecto	The best	Check my page	
How many followings should be targeted	150				
How many posts should be commented	50				

Targeting IDs and Commenting

- You could insert a list of your competitors in the cells; then specify how many and what comments should be inserted.

An Excel file sample for earning customers from your preferred pages with comments

Directly earn customers by targeting a list of IDs and commenting for them					
List of IDs (pages)	ny_gallery	kami_tops	nice_jeans	
Your preferred comments	Good job	perfecto	The best	Check out my page	
Amount of comments	10				

Unfollow

- You could use this option to determine unfollow rate for specific users.

An Excel file sample for unfollowing pages with more than 3000 followers

Users having more than this number of posts should not be unfollowed	
Amount of posts	3000

- The main option is the following, which you can unfollow a specific amount.

An Excel file sample for unfollowing 1000 followers from your page

Unfollow Users	
Amount of users to be unfollowed	1000

General Filtering

- You could set the Robot to like or not based on a minimum or maximum like on a post.

An Excel file sample for filtering a page with min 500 and max followers of 5K

General Filter - Follow page based on the minimum and maximum follower a user has	
Max	5000
Min	500

- Here you could set a robot to follow based on a minimum or maximum followers.

An Excel file sample for following pages having minimum 1K and maximum 6K followers.

General Filter - Follow page based on the minimum and maximum follower a user has	
Min	6000
Max	1000

Black List

- A list of keywords could be set for the robot to be avoided and not set comment or like on the encounter.

An Excel file sample for the blacklist, on which robot will not like or comment.

Black List - (when robot encountered such keywords, do not follow, like and comment)						
Forbidden Words	Women_dress	Kids_wearing	underwear			

Commenting based on keywords in the captions

- A list of keywords could be set, in case the robot finds them in the caption, then leave a comment.

An Excel file sample for searching keywords in captions

Comment for the posts that the following keywords are included in their caption						
Your preferred keywords	trend	men	gentlemen	luxury		

Using multiple robots at the same time using a proxy

- The robot is not limited to one Instagram account, and by copying the Bot folder in another directory, set another account and run them simultaneously. But be noticed that if you are going to use **more than 4 accounts**, Instagram may trace your IP address. So in such cases (using more than 4 accounts on a system), it is recommended to use a proxy.

An Excel file sample for setting proxy

Proxy Setting	
IP	115.48.254.96
Port	8081
